

## Cube of Dreams

### **Materials Needed:**

Scissors

Tape

Optional: Magazines, photos or computer printouts

### **Instructions:**

Ask students to fill each square of the cube according to the chart on the next page.

Students can complete the squares by writing, drawing or pasting cutouts or printouts.

Cut out the pattern, and fold to create tabs. Fold into a cube, and use the tabs to wrap around the edges. Tape the tabs to hold the cube together.

Encourage students to keep their cube on their desk at home, in their locker, etc., to remind themselves of their dreams and goals.
